

Full Visa Readiness Report

Subject	Test User
Report Date	5/2/2026
Report ID	LVA-20260502-TESTUSER
Occupation	Software Engineer

Software Engineer

Full Visa Readiness Report

Generated Date: 5/2/2026

User Information

Name: Test User
Email: test@example.com
Goal: Skilled migration
Passport Country: Turkey
Age: 29
Occupation: Software Engineer
English Level: Superior

Executive Summary

- This report compares 189, 190, 491 in one view, bringing study, graduate, employer-sponsored, and skilled pathway signals together.
- The partial points signal is 50; this mathematical signal may affect the relative position of points-tested pathways.
- Skills assessment, nomination context, sponsorship details, and evidence preparation can materially change the pathway strength comparison.

Signal Snapshot

Strongest signal: Skilled Work Regional Visa (491)

Secondary signals: Skilled Independent Visa (189), Skilled Nominated Visa (190)

Confidence: Moderate

Confidence is moderate because English and occupation details are available, but skills assessment and full points context remain unclear (partial points signal: 50). Sponsorship context appears limited. This is general information only and depends on individual circumstances.

Primary Limiting Factor

Points signal below commonly referenced thresholds

The partial mathematical points signal is 50. For points-tested pathways, this signal may limit pathway strength and depends on individual circumstances.

What May Change Your Position

Skills assessment

Confirming skills assessment may affect pathway strength.

Nomination context

State nomination or regional context may affect pathway signals.

Points-table factors

Structured Pathway Comparison

Visa	Confidence	Friction Level
Skilled Independent Visa (189)	Medium	EXTREME
Skilled Nominated Visa (190)	Medium	EXTREME
Skilled Work Regional Visa (491)	Medium	EXTREME

Skilled Independent Visa (189) - Reality Check: Historical invitation data indicates the current score (65) sits more than 10 points below the recent 189 reference (95). ACS experience deduction risk is high because declared experience is below 2 years. ACS deducted experience may reduce claimed skilled years.

Skilled Nominated Visa (190) - Reality Check: Historical invitation data indicates the current score (70) sits more than 10 points below the recent 190 reference (85). ACS experience deduction risk is high because declared experience is below 2 years. ACS deducted experience may reduce claimed skilled years.

Skilled Work Regional Visa (491) - Reality Check: Historical invitation data indicates the current score (80) is at or above the recent 491 reference (75). ACS experience deduction risk is high because declared experience is below 2 years. ACS deducted experience may reduce claimed skilled years.

Pathway Strength Comparison

Skilled Independent Visa (189)

Strength: Moderate signal

Friction: High

Evidence load: High

Typical path: Invitation-based skilled pathway

Signal reasons:

- Points-tested skilled pathway context
- Occupation and English inputs affect signal

Limiting factors:

- Invitation round settings may affect pathway
- Points estimate may be incomplete based on provided information

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Skilled Nominated Visa (190)

Strength: Moderate signal

Friction: High

Evidence load: High

Typical path: State or territory nomination pathway

Signal reasons:

- Skilled nomination pathway context

Limiting factors:

- State or territory nomination settings may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Skilled Work Regional Visa (491)

Strength: Moderate signal

Friction: Medium

Evidence load: High

Typical path: Regional provisional pathway

Signal reasons:

- Regional skilled pathway context

Limiting factors:

- Regional nomination or relative sponsorship context may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Confidence Explanation

Confidence is moderate because English and occupation details are available, but skills assessment and full points context remain unclear (partial points signal: 50). Sponsorship context appears limited. This is general information only and depends on individual circumstances.

Evidence Readiness Snapshot

Identity and passport: Provided

Passport country was provided; identity documents are typically prepared separately.

English evidence: Provided

English level was provided in the form.

Occupation and skills evidence: Unclear

Occupation was provided; skills assessment or work evidence may still vary by pathway.

Health, character, and translation documents: Typically required

Health checks, police certificates, and translations can vary by pathway and individual circumstances.

Points Booster Simulator

Estimated Points: 50

This scenario reflects a mathematical change only and does not represent eligibility or outcome.

If a points-table factor changes, the mathematical score position may change as follows.

190 nomination points scenario: +5

Resulting mathematical estimate: 55

If the 190 state or territory nomination factor is present, the mathematical score position may change by +5.

491 nomination/sponsorship points scenario: +15

Resulting mathematical estimate: 65

If the 491 nomination or relative sponsorship factor is present, the mathematical score position may change by +15.

Bridge to PR / Typical Progression Pathways

Typical progression pathways in the Australian visa system may include:

Student pathway context: 500 -> 485 189/190/491

After a student pathway, graduate and skilled migration options may be considered together in some profiles. This is general information only and depends on individual circumstances.

Employer sponsorship context: 482 -> Employer-sponsored permanent pathways

In some profiles, 482 context may be considered alongside employer-sponsored permanent pathways; outcomes depend on individual circumstances.

Regional progression context: 491 -> 191

This may be considered a typical system progression after the relevant period if criteria are met.

Pathway Friction / Reality Check

Skilled Independent Visa (189): Reality check

Invitation rounds and points competition may affect this pathway.

Skilled Nominated Visa (190): Reality check

State or territory nomination settings may affect this pathway.

Skilled Work Regional Visa (491): Reality check

Regional requirements and nomination or sponsorship context may affect this pathway.

Premium Sections

Historical Invitation Trends

Software Engineer (261313)

Subclass	Estimated Points	Estimated Wait
189	95	6-9 months
190	85	4-8 months
491	75	3-7 months

Trend estimates are analytical planning references only and do not guarantee invitation outcomes. Estimated invitation points and

wait windows derived from 2025-2026 trend patterns. For planning context only.

Living Cost Projection

Sydney - Single (AUD)

Monthly Rent	Monthly Groceries	Monthly Transport	Monthly Total
2700	650	220	3570

Living cost projections are indicative monthly planning estimates and may vary by suburb and lifestyle.

Strategic Gantt Chart

Window: 0-6 months

1

Step 1: English Test Signal Window

Weeks 1-6

This period typically captures exam booking, score-cycle timing, and English-result availability as model inputs.

2

Step 2: Skills Assessment Evidence Window

Weeks 4-10

This period usually concentrates reference structure, duties mapping, and qualification documents into the

3

Step 3: EOI and State-Interest Window

Weeks 8-16

This period typically reflects when EOI variables and state-interest signals begin to interact in the comparison

4

Step 4: Application Readiness Window

Weeks 16-24

This period usually captures health, police, and identity-document completeness as readiness variables.

Risk Indicators

High Points-table position below minimum threshold

Based on the current dataset, the partial points estimate is 50. Historical invitation references and minimum thresholds may indicate higher competitive pressure.

Document-Level Specificity

CRITICAL

[] Skills-assessment evidence is the primary data variable when occupation data is missing.

Identity

- ☐ Passport (6+ months validity)
- ☐ Birth Certificate (NAATI translated)

English

- ☐ Test Results (Less than 2 years old)

Skills

- ☐ Degree Certificates
- ☐ Academic Transcripts
- ☐ Employment References (aligned with Authority rules)

Gap Analysis & Considerations

Gap Analysis & Considerations

1. Data analysis indicates a material gap between the current points profile and recent invitation references, with English score weight acting as a major variable.
2. Scenario modelling shows that +5 to +15 point changes linked to nomination or language-related variables can materially alter the comparative position.
3. Historical invitation movement suggests EOI competitiveness is more sensitive when score uplift variables are not yet reflected in the profile.
