

LogiVisa Premium Readiness Assessment

AI-Powered Migration Strategy & Viability Report

Prepared for	Test User
Report Date	7/24/2026
Report ID	LVA-20260724-TESTUSER
Occupation	Software Engineer

Software Engineer

This report is a compliance-driven audit of your visa viability against binding 1 July 2026 regulatory thresholds, state nomination signals, and evidentiary requirements.

Full Visa Readiness Report

This report is a compliance-driven audit of your visa viability against binding 1 July 2026 regulatory thresholds, state nomination signals, and evidentiary requirements.

User Information

Generated Date	7/24/2026
Name	Test User
Occupation	Software Engineer
Age	29
English Level	Superior
Goal	Skilled migration

Executive Summary

- Subclass 189/190/491 currently ineligible. See the Visa Viability Ranking below for details.
- This report evaluates 189, 190, 491 against binding 1 July 2026 rule thresholds, cross-referencing study, graduate, employer-sponsored, and skilled pathway signals.
- Estimated base points are approximately 50, but ranking confidence remains limited because some profile details (e.g., English test evidence) are not yet provided.
- Skills assessment, nomination context, sponsorship evidence, and documentation completeness directly determine the pathway strength ranking.

Glossary — How to Read This Report

Terms that repeat throughout this report are defined once below. Terms specific to a single section are explained inline within that section.

Confidence

Confidence indicates how well-verified your key profile inputs are and whether they meet the relevant criteria -- rated Low, Medium, or High.

Strength

Signal strength reflects how closely your profile matches the typical pattern of applicants who succeed on this pathway -- distinct from Confidence (data verification) or Friction (points/benchmark gap).

Friction Level

Friction Level indicates the gap between your profile's points and the current invitation benchmark for this pathway -- rated Low, Medium, High, or Extreme.

Signal Confidence

Signal confidence indicates how much weight this data point should be given -- not how well the profile matches the pathway.

Evidence Load

Evidence load reflects the volume and complexity of documentation this pathway typically requires -- not whether that evidence has been provided yet (see Evidence status).

Evidence Status

Evidence status shows whether a specific document or proof point has actually been supplied in this profile -- not how much evidence is required overall (see Evidence load).

Points Gap

Points gap is the numeric distance between your profile's estimated points and the threshold this pathway currently requires.

Hard Gate

A Hard Gate is a binding eligibility rule -- an age cap, salary floor, points minimum, or tenure requirement -- that, if breached, makes a pathway ineligible regardless of any other favorable signal.

Missing Information & Assumptions

This report was generated using standard assumptions. Please update your intake form for a personalized assessment.

- Current country

Visa Viability Ranking

The ranking below orders every possible visa pathway from strongest to weakest based on compliance status, points threshold, and profile fit.

Below Points Threshold: Your profile's estimated points fall below the minimum threshold required for this pathway.

189 - Skilled Independent Visa

Below Points Threshold

Your estimated baseline score is 50 points, leaving a 15-point gap to the 189 visa minimum of 65. As a purely independent pathway, subclass 189 does not offer any state nomination or family sponsorship points to help offset this shortfall. To make this visa viable, you must close this points deficit entirely through improving your personal credentials (e.g., achieving a Superior English exam result for +20 points, or accumulating more skilled work experience).

190 - Skilled Nominated Visa

Below Points Threshold

Your estimated score of 50 points is 15 points below the 65-point minimum. While obtaining a state nomination (subclass 190) provides a +5 point boost, bringing your potential score to 55, you would still face a 10-point shortfall. You must raise your base score to at least 60 to make this option viable. Refer to the State Nomination Tracker in this report to check if states are actively nominating Software Engineer.

491 - Skilled Work Regional Visa

Below Points Threshold

Your estimated score of 50 points is 15 points below the 65-point threshold. However, subclass 491 regional nomination or family sponsorship offers a substantial +15 point boost, bringing your potential score to 65 and reducing your remaining gap to only 0 points. To make this pathway viable, you must raise your base score to at least 50. Subclass 491 is the most realistic and accessible skilled pathway for your profile, requiring only minor base points improvements (such as a higher English test result) to reach eligibility.

Your estimated score is 50; you need 15 more points to reach the 189/190/491 minimum of 65. Your major points-loss categories are: Australian experience: 0/20, Education: 0/20, Overseas experience: 0/15. For a category-by-category points breakdown and how to raise your score on the points-tested subclasses (189/190/491) above, see the "Points Breakdown" section of this report.

State Nomination Tracker

State nomination relevance cannot be assessed while the underlying visa pathway is ineligible. See the Visa Viability Ranking section for the full reason.

Lodgement-Ready Checklist

This checklist lists the steps typically expected before lodging an application.

URGENT

English test readiness signal

English exam readiness is typically one of the first evidence areas considered when English test data is missing or currently below stronger migration target bands.

**IMPORTANT****Skills assessment pathway alignment with ACS**

Skills assessment timing can influence points claims, nomination readiness, and progression from planning context to a lodgement-capable profile.

**BLOCKED****State/EOI alignment cannot proceed yet**

Blocked: profile does not currently meet the Subclass 189 threshold. See the Visa Viability Ranking section for the full reason.

This checklist is an educational planning reference and can be refreshed whenever points, English results, or state pathway context changes.

Signal Snapshot**Strongest signal**

Skilled Work Regional Visa (491)

Secondary signals

Skilled Independent Visa (189), Skilled Nominated Visa (190)

Confidence

Limited

Points Breakdown

The table below shows which categories your estimated score comes from for points-tested pathways.

Category	Points Earned	Maximum	Note
Age	30	30	25-32 age bracket
English	20	20	Provided level: Superior
Overseas experience	0	15	Experience not provided
Australian experience	0	20	Experience not provided
Education	0	20	Education level not provided
Partner status	0	10	Partner status not provided

TOTAL: 50 pts (65 required)

Occupation / Skills Assessment does not carry points-table score directly, but determines eligibility for other pathways (e.g. 482/186).

What May Change Your Position**Skills assessment**

Confirming skills assessment may affect pathway strength.

Nomination context

State nomination or regional context may affect pathway signals.

Points-table factors

Age, English, nomination, and other points factors may change the mathematical position.

Structured Pathway Comparison

The following comparison places each possible pathway beside its confidence, friction, and practical readiness signals.

Visa	Confidence	Friction Level
Skilled Independent Visa (189)	Low	EXTREME
Skilled Nominated Visa (190)	Low	EXTREME
Skilled Work Regional Visa (491)	Low	EXTREME

Friction Level: EXTREME: A substantial gap exists between your profile and recent invitation benchmarks -- multiple compounding factors currently work against this pathway.

Confidence: Low: Limited alignment; key profile inputs are missing, unverified, or unclear.

Skilled Independent Visa (189) - Reality Check: Historical invitation data indicates the current score (50) sits more than 10 points below the recent 189 reference (95). Historical 189 patterns for this occupation show stronger selection pressure on profiles below 90 points. ACS experience deduction risk is high because declared experience is below 2 years.

Skilled Nominated Visa (190) - Reality Check: Historical invitation data indicates the current score (55) sits more than 10 points below the recent 190 reference (85). ACS experience deduction risk is high because declared experience is below 2 years.

Skilled Work Regional Visa (491) - Reality Check: Historical invitation movement shows the current score is close to, but still below, recent 491 references (65 vs 75). ACS experience deduction risk is high because declared experience is below 2 years.

ACS deducted experience may reduce claimed skilled years.

Pathway Strength Comparison

Pathway strength is assessed against binding regulatory thresholds first; any Hard Gate violation overrides the underlying signal and forces the pathway to Ineligible.

Typical Path: The most common scenario followed by applicants who succeed on this pathway.

Signal Reasons: The main favorable factors contributing to this signal-strength assessment.

Limiting Factors: The main factors currently weakening this pathway or requiring additional evidence/improvement.

Skilled Independent Visa (189)

Below Points Threshold: Ineligible — see the Visa Viability Ranking section for the full reason.

Strength: Limited signal

Friction: Extreme

Evidence load: High

Typical path: Invitation-based skilled pathway

Signal reasons:

- Points-tested skilled pathway context
- Occupation and English inputs affect signal

Limiting factors:

- Invitation round settings may affect pathway

- Points estimate may be incomplete based on provided information

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Skilled Nominated Visa (190)

Below Points Threshold: Ineligible — see the Visa Viability Ranking section for the full reason.

Strength: Limited signal

Friction: Extreme

Evidence load: High

Typical path: State or territory nomination pathway

Signal reasons:

- Skilled nomination pathway context

Limiting factors:

- State or territory nomination settings may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Skilled Work Regional Visa (491)

Below Points Threshold: Ineligible — see the Visa Viability Ranking section for the full reason.

Strength: Limited signal

Friction: Extreme

Evidence load: High

Typical path: Regional provisional pathway

Signal reasons:

- Regional skilled pathway context

Limiting factors:

- Regional nomination or relative sponsorship context may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Unclear
- Points table position: Unclear

Friction Level: EXTREME: A substantial gap exists between your profile and recent invitation benchmarks -- multiple compounding factors currently work against this pathway.

Confidence Explanation

Confidence is limited because key inputs such as occupation and English level are missing or insufficient. This report is general information only and depends on individual circumstances.

Evidence Readiness Snapshot

Identity and passport: Provided

Passport country was provided; identity documents are typically prepared separately.

English evidence: Provided

English level was provided in the form.

Occupation and skills evidence: Unclear

Occupation was provided; skills assessment or work evidence may still vary by pathway.

Employment experience signal: Missing

Employment experience not provided — this may significantly change your result. Skilled employment experience can add up to 20 points (capped). Reference table: Overseas 3-5 yrs +5, 5-8 yrs +10, 8+ yrs +15; Australian 1-3 yrs +5, 3-5 yrs +10, 5-8 yrs +15, 8+ yrs +20; combined cap: 20. If you have relevant experience, add it above to get a more accurate result — your current score assumes zero.

Health, character, and translation documents: Typically required

Health checks, police certificates, and translations can vary by pathway and individual circumstances.

Points Booster Simulator

Estimated Points: 50

This scenario reflects a mathematical change only and does not represent eligibility or outcome.

The Australian points test (Schedule 6A, Migration Regulations 1994) uses fixed numerical gains per factor. Scenarios below are based on official points table coefficients — not estimates.

Scenario	Points Change	New Total
NAATI CCL Community Languages credential	+5	55
Australian Professional Year program	+5	55
Single applicant or partner with skilled qualifications + Competent English	+10	60
190 State or Territory Nomination	+5	55
491 Regional Nomination or Eligible Relative Sponsorship	+15	65
NAATI CCL Community Languages credential + Single applicant or partner with skilled qualifications + Competent English	+15	65
Single applicant or partner with skilled qualifications + Competent English + 491 Regional Nomination or Eligible Relative Sponsorship	+25	75

Financial Roadmap

The figures below are an estimated breakdown of the major official and living-cost items you may encounter during the application process.

Category	Amount	Note
----------	--------	------

Category	Amount	Note
Government Visa Application Charge (VAC)	From AUD 6,135 (main applicant)	Official visa application charges vary by subclass and were updated for the post-1 July 2026 schedule. Subclass 482 base charge: AUD 4,015. Subclass 189 base charge: AUD 6,135. Subclass 190/491 base charge: about AUD 6,140. Charges can be indexed periodically and should be verified before lodgement.
English Language Test (IELTS / PTE / OET)	AUD 385–590 (varies by test and location)	Tests accepted for Australian migration include: IELTS Academic or General Training (~AUD 385–405 per attempt), PTE Academic (~AUD 375–395), OET (Occupational English Test, used by healthcare occupations, ~AUD 587), and TOEFL iBT (~AUD 340–390, accepted for some streams). Minimum Competent English thresholds: IELTS 6.0 in all four bands, PTE 50 in all bands. Achieving Superior English (IELTS 8.0+ in all four bands or PTE 79+) unlocks 20 additional points in the Australian points test — a significant investment if retesting is needed. Scores must be no more than 3 years old at time of visa grant.
Family/dependant information not provided	Cannot be assessed	Family/dependant information not provided — second instalment obligations cannot be assessed. Where a dependant aged 18+ cannot show functional English, a second instalment can apply per dependant.
Skills Assessment (by Assessing Authority)	AUD 530–900+ (varies by authority and occupation)	The assessing authority is determined by your ANZSCO occupation code: IT/ICT roles (ANZSCO Major Group 26) ACS (AUD 530–665, 6–12 weeks); Engineering Engineers Australia (AUD 735–900, 4–10 weeks); Healthcare professions AHPRA (AUD 890+, requires registration); Accounting CPA Australia, CAANZ, or IPA (AUD 600–800); General professional and trade occupations VETASSESS (AUD 850, 10–16 weeks). All assessments require certified copies of qualifications, official transcripts, and detailed employment reference letters specifying duties, dates, and hours worked. ACS requires a minimum of 1 year of relevant IT work experience in the past 8 years. Negative assessment outcomes can be challenged or a re-assessment sought, which incurs additional fees (typically 50–80% of the original charge).

Category	Amount	Note
Health Examination (eMedical)	AUD 300–500+ (per person, varies by age and country of residence)	Every applicant must complete a medical examination through Bupa Medical Visa Services, the panel provider approved by the Department of Home Affairs. Indicative costs: adults AUD 300–400; children under 15 approximately AUD 150–250. The examination includes a chest X-ray (for applicants 11+), blood tests, and a general physical assessment. Medical results are electronically transmitted to the Department of Home Affairs via the eMedical system — there is no paper report to submit. Results are valid for 12 months. Applicants from tuberculosis-prevalent countries may require additional chest monitoring, extending the process by 6–12 months.
Police Clearance Certificates	AUD 42–200+ (per person, varies by country)	Every applicant aged 18+ must provide police clearance certificates for every country where they have lived for 12 months or more in the past 10 years (for skilled visas). The Australian Federal Police (AFP) check costs AUD 42 and is processed online within 15 business days. International certificates vary widely: United Kingdom (ACPO check, ~GBP 25), United States (FBI Identity History, ~USD 18 + fingerprint costs), India (state-level, ~INR 500–2,000 plus notarisation), China (~CNY 80–100 via local public security bureau). Non-English certificates must be translated by a NAATI-certified translator. Plan for 4–12 weeks lead time for overseas police clearances — start these before lodging your EOI.
NAATI-Certified Translation	AUD 80–200 per page (NAATI-certified translator)	All documents not in English must be translated by a NAATI-certified translator (National Accreditation Authority for Translators and Interpreters). Rates range from AUD 80 per page for simple personal documents to AUD 150–200 per page for technical or legal documents. For a typical visa application with 8–12 documents (transcripts, employment certificates, marriage certificate, police clearances), translation costs commonly total AUD 800–2,500. NAATI-certified translators can be located via the NAATI online register — never use uncertified translations as they will be rejected by the Department of Home Affairs.
Registered Migration Agent (RMA) or Immigration Lawyer	AUD 3,000–10,000+ (varies by visa type and case complexity)	Engaging a Registered Migration Agent (RMA) or immigration lawyer is not mandatory, but is strongly recommended for applications involving prior visa refusals, complex employment histories, or family members with health or character issues. Typical fee ranges: full EOI + 189/190/491 skilled application: AUD 3,000–8,000; state nomination assistance only: AUD 1,000–2,500; 482 employer-sponsored nomination and visa: AUD 5,000–10,000+. Verify any agent's registration via the MARA (Migration Agents Registration Authority) public register at mara.gov.au . Never pay upfront in full before the work commences.

Bridge to PR / Typical Progression Pathways

This section outlines the stages typically followed to move from your profile's current state to Permanent Residency (PR).

Primary progression pathways for your profile:

Regional progression context: 491 -> 191

After obtaining a subclass 491 visa, you must live and work in a designated regional area for at least 3 years and meet taxable income requirements (currently AUD 53,900/year; refer to the Financial Roadmap). Given your current points gap of 15 points, securing the +15 point regional nomination via subclass 491 is a highly realistic and essential stepping stone to permanent residency (subclass 191).

State nomination progression: 190 EOI -> 190 Permanent Residency

Progressing through subclass 190 involves obtaining a state nomination (+5 points). Given your current gap of 15 points, state sponsorship is crucial to help bridge the remaining points needed to reach a competitive invitation benchmark.

Independent skilled progression: 189 EOI -> 189 Permanent Residency

For subclass 189, progression is purely points-based without state nomination. Given your current gap of 15 points, you must actively pursue single or combined points boosters (e.g. English test, NAATI) to become competitive for invitation rounds.

Other potential or alternative progression pathways:

Student pathway context: 500 -> 485 189/190/491

Taking a Student visa (500) to study in Australia can be an alternative route to unlock post-study graduate visas and eventual PR pathways. This requires additional financial investment and time.

Employer sponsorship context: 482 -> Employer-sponsored permanent pathways

Employer sponsorship (subclass 482) is an alternative route allowing you to remain in Australia with employer support. It can lead to permanent pathways like the 186 ENS later.

Premium Sections

These sections provide deeper planning data beyond the core report.

Historical Invitation Trends

Historical trend data unavailable - occupation not yet verified against our database. ()

Subclass	Estimated Points	Estimated Wait
----------	------------------	----------------

Historical trend data unavailable - occupation not yet verified against our database.

Living Cost Projection

Sydney - Single (AUD)

Monthly Rent	Monthly Groceries	Monthly Transport	Monthly Total
2700	650	220	3570

Living cost projections are indicative monthly planning estimates and may vary by suburb and lifestyle.

Strategic Gantt Chart

The timeline below shows the steps in the application process and their typical time windows; it is a planning reference, not a personal commitment.

Window: 0-6 months

1

Step 1: English Test Signal Window

Weeks 1-6

This period typically captures exam booking, score-cycle timing, and English-result availability as model inputs.

2

Step 2: Skills Assessment Evidence Window

Weeks 4-10

This period usually concentrates reference structure, duties mapping, and qualification documents into the

3

Step 3: Recovery: Skilled Experience Points

Weeks 8-16

Bank additional skilled-employment points and finalize your Skills Assessment (~15-point gap): each further year of

4

Step 4: Recovery: Stack Secondary Boosters

Weeks 16-24

Stack further points: enrol in NAATI CCL for +5, and lodge a 491 regional EOI for +15 via state nomination, to move

Critical Compliance Alerts

These are mandatory compliance flags, not optional notes. Each alert reflects a binding 1 July 2026 rule threshold and must be resolved or verified before a pathway can be relied upon.

High - Points-table position below minimum threshold

Based on the current dataset, estimated base points are 50. Historical invitation references and minimum thresholds may indicate higher competitive pressure.

Audit-Ready Proof Checklist

Documents required for submission including IMM digital portal uploads, proof-of-funds validation rules, and language test timeline constraints.

CRITICAL

[] Skills-assessment evidence is the primary data variable when occupation data is missing.

Identity

- [] Passport (6+ months validity)
- [] Birth Certificate (NAATI translated)

English

☐ Test Results (Less than 2 years old)

Skills

☐ Degree Certificates

☐ Academic Transcripts

☐ Employment References (aligned with Authority rules)

Gap Analysis & Considerations

The following items are educational priorities to consider while assessing application readiness.

1. IMPORTANT

Data analysis indicates a material gap between the current points profile and recent invitation references, with English score weight acting as a major variable.

2. IMPORTANT

Scenario modelling shows that +5 to +15 point changes linked to nomination or language-related variables can materially alter the comparative position.

3. IMPORTANT

Historical invitation movement suggests EOI competitiveness is more sensitive when score uplift variables are not yet reflected in the profile.
