

Full Visa Readiness Report

Subject	Ahmet Yilmaz
Report Date	5/2/2026
Report ID	LVA-20260501-AHMETYILMA
Occupation	Software Engineer (261313)

Software Engineer (261313)

Full Visa Readiness Report

Generated Date: 5/2/2026

User Information

Name: Ahmet Yilmaz
Email: ahmet.yilmaz@example.com
Goal: Skilled Nominated (190) as Software Engineer
Current Country: Turkey
Passport Country: Turkey
Age: 30
Occupation: Software Engineer (261313)
English Level: PTE 79+ (Superior)
Sponsor/Family: Married, spouse English only (no skill assessment)
Biggest Concern: Invitation score competitiveness and timing

Executive Summary

- This report compares 190, 189, 491, 820_801 in one view, bringing study, graduate, employer-sponsored, and skilled pathway signals together.
- The partial points signal is 50; this mathematical signal may affect the relative position of points-tested pathways.
- Skills assessment, nomination context, sponsorship details, and evidence preparation can materially change the pathway strength comparison.
- Gold Lead simulation: Software Engineer (261313), target visa 190, age 30, superior English, 6 years offshore experience.
- Skill mapping validation: authority resolved as ACS; ACS deduction applied: Yes.
- Points (motor): 189=75, 190=80, 491=90.
- Financial estimate (motor): 8925 AUD (Government + Mandatory).

Signal Snapshot

Strongest signal: Skilled Work Regional Visa (491)
Secondary signals: Skilled Nominated Visa (190), Skilled Independent Visa (189)
Confidence: Moderate

Confidence is stronger because age (30), English level, occupation (Software Engineer (261313)), and passport country (Turkey) are provided, while some pathway-specific evidence still needs separate review (partial points signal: 50). This is general information only.

Primary Limiting Factor

Points signal below commonly referenced thresholds
The partial mathematical points signal is 50. For points-tested pathways, this signal may limit pathway strength and depends on individual circumstances.

What May Change Your Position

Nomination context

State nomination or regional context may affect pathway signals.

Sponsor or relationship evidence

Sponsor or relationship evidence may change the signal for related pathways.

Points-table factors

Age, English, nomination, and other points factors may change the mathematical position.

Structured Pathway Comparison

Visa	Confidence	Friction Level
Skilled Nominated Visa (190)	Medium	MEDIUM
Skilled Independent Visa (189)	Medium	EXTREME
Skilled Work Regional Visa (491)	Medium	LOW
Partner Visa (Onshore) (820_801)	Low	MEDIUM

Skilled Nominated Visa (190) - Reality Check: Historical invitation movement places the current score within a comparatively narrow range of recent 190 references (80 vs 85). ACS deducted experience may reduce claimed skilled years.

Skilled Independent Visa (189) - Reality Check: Historical invitation data indicates the current score (75) sits more than 10 points below the recent 189 reference (95). Historical 189 patterns for this occupation show stronger selection pressure on profiles below 90 points. ACS deducted experience may reduce claimed skilled years.

Skilled Work Regional Visa (491) - Reality Check: Historical invitation data indicates the current score (90) is at or above the recent 491 reference (75). ACS deducted experience may reduce claimed skilled years.

Partner Visa (Onshore) (820_801) - Reality Check: ACS deducted experience may reduce claimed skilled years. Relationship evidence preparation is documentation-heavy and consistency-sensitive.

Pathway Strength Comparison

Skilled Nominated Visa (190)

Strength: Moderate signal

Friction: High

Evidence load: High

Typical path: State or territory nomination pathway

Signal reasons:

- Skilled nomination pathway context

Limiting factors:

- State or territory nomination settings may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Provided
- Points table position: Unclear

Skilled Independent Visa (189)

Strength: Moderate signal

Friction: High

Evidence load: High

Typical path: Invitation-based skilled pathway

Signal reasons:

- Points-tested skilled pathway context
- Occupation and English inputs affect signal

Limiting factors:

- Invitation round settings may affect pathway
- Points estimate may be incomplete based on provided information

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Provided
- Points table position: Unclear

Skilled Work Regional Visa (491)

Strength: Moderate signal

Friction: Medium

Evidence load: High

Typical path: Regional provisional pathway

Signal reasons:

- Regional skilled pathway context

Limiting factors:

- Regional nomination or relative sponsorship context may affect pathway

Evidence status:

- English evidence: Provided
- Occupation details: Provided
- Skills assessment: Provided
- Points table position: Unclear

Partner Visa (Onshore) (820_801)

Strength: Limited signal

Friction: High

Evidence load: High

Typical path: Onshore partner pathway

Signal reasons:

- Partner pathway context

Limiting factors:

- Relationship evidence and sponsor context are central to this pathway

Evidence status:

- Relationship evidence: Missing
- Sponsor evidence: Typically required
- Identity documents: Typically required

Confidence Explanation

Confidence is stronger because age (30), English level, occupation (Software Engineer (261313)), and passport country (Turkey) are provided, while some pathway-specific evidence still needs separate review (partial points signal: 50). This is general information only.

Evidence Readiness Snapshot

Identity and passport: Provided

Passport country was provided; identity documents are typically prepared separately.

English evidence: Provided

English level was provided in the form.

Occupation and skills evidence: Provided

Occupation was provided; skills assessment or work evidence may still vary by pathway.

Sponsorship evidence: Provided

Sponsorship context can be central for employer or partner pathways.

Relationship evidence: Unclear

Relationship evidence categories are typically reviewed in detail for 820/801.

Health, character, and translation documents: Typically required

Health checks, police certificates, and translations can vary by pathway and individual circumstances.

Points Booster Simulator

Estimated Points: 80

This scenario reflects a mathematical change only and does not represent eligibility or outcome.

ACS Deduction Applied: 2 years deducted from offshore experience (6 4 years) per ACS assessment rules. | [ACS] ACS deducted experience may reduce claimed skilled years.

NAATI or Professional Year Scenario: +5

Resulting mathematical estimate: 85

If a NAATI CCL or Professional Year variable were added, the points model would add +5 points. Current score + 5 = 80

State Nomination Scenario (Subclass 190): +5

Resulting mathematical estimate: 85

If a 190 state nomination variable were present, the model would add +5 points (190 total: 80)

Regional Nomination Scenario (Subclass 491): +15

Resulting mathematical estimate: 95

If a 491 regional nomination variable were present, the model would add +15 points (491 total: 90)

Partner Skills Scenario: +10

Resulting mathematical estimate: 90

If partner-skills points were available, the model would add +10 points. Current score + 10 = 85

Financial Roadmap

Category	Amount	Note
Visa Application Charge (M...	AUD 7,365	Based on selected subclass and family composition.
Skills Assessment (Estimate)	AUD 560	Estimated mandatory third-party expenses.
Health & Character Checks	AUD 1,000	Estimated mandatory third-party expenses.
NAATI CCL (Optional)	AUD 814	Optional/strategy-dependent cost item.
Professional Year (Optional)	AUD 9,000	Optional/strategy-dependent cost item.
Translation / Notarization ...	AUD 300	Optional/strategy-dependent cost item.

Bridge to PR / Typical Progression Pathways

Typical progression pathways in the Australian visa system may include:

Student pathway context: 500 -> 485 189/190/491

After a student pathway, graduate and skilled migration options may be considered together in some profiles. This is general information only and depends on individual circumstances.

Employer sponsorship context: 482 -> Employer-sponsored permanent pathways

In some profiles, 482 context may be considered alongside employer-sponsored permanent pathways; outcomes depend on individual circumstances.

Regional progression context: 491 -> 191

This may be considered a typical system progression after the relevant period if criteria are met.

Partner pathway stages: 820 -> 801

820 temporary stage and 801 permanent stage are typical stages of the same onshore partner pathway.

Pathway Friction / Reality Check

Skilled Nominated Visa (190): Reality check

State or territory nomination settings may affect this pathway.

Skilled Independent Visa (189): Reality check

Invitation rounds and points competition may affect this pathway.

Skilled Work Regional Visa (491): Reality check

Regional requirements and nomination or sponsorship context may affect this pathway.

Partner Visa (Onshore) (820_801): Reality check

Relationship evidence is central to this pathway.

Premium Sections

Historical Invitation Trends

Software Engineer (261313)

Subclass	Estimated Points	Estimated Wait
189	95	6-9 months
190	85	4-8 months
491	75	3-7 months

Trend estimates are analytical planning references only and do not guarantee invitation outcomes. Estimated invitation points and wait windows derived from 2025-2026 trend patterns. For planning context only.

Living Cost Projection

Sydney - Couple (AUD)

Monthly Rent	Monthly Groceries	Monthly Transport	Monthly Total
3400	1000	360	4760

Living cost projections are indicative monthly planning estimates and may vary by suburb and lifestyle.

Strategic Gantt Chart

Window: 6-12 months

1

Step 1: English Score Development Window

Months 1-3

This window often determines whether higher English-score bands enter the points model.

2

Step 2: Skills Assessment and Experience Window

Months 2-5

This window typically consolidates assessment timing with work-history evidence depth and classification.

3

Step 3: EOI and Nomination Window

Months 4-8

This window usually captures EOI signal changes, invitation-round movement, and nomination-linked variables.

4

Step 4: Application Assembly Window

Months 8-12

This window generally reflects how quickly the profile can convert into a complete application-ready evidence set.

Risk Indicators

High Partner pathway: sponsor or partner information not provided

Sponsorship and relationship context are core data inputs for the partner pathway; when they are missing, the comparative signal weakens.

High Points-table position below minimum threshold

Based on the current dataset, the partial points estimate is 50. Historical invitation references and minimum thresholds may indicate higher competitive pressure.

Document-Level Specificity

Identity

- ☐ Passport (6+ months validity)
- ☐ Birth Certificate (NAATI translated)

English

- ☐ Test Results (Less than 2 years old)

Skills

- ☐ Degree Certificates
- ☐ Academic Transcripts
- ☐ Employment References (aligned with Authority rules)

Spouse/Family

- ☐ Marriage Certificate
- ☐ Evidence of de-facto (if applicable)
- ☐ Spouse English evidence

Gap Analysis & Considerations

Gap Analysis & Considerations

1. Data analysis indicates a material gap between the current points profile and recent invitation references, with English score weight acting as a major variable.
2. Scenario modelling shows that +5 to +15 point changes linked to nomination or language-related variables can materially alter the comparative position.
3. Historical invitation movement suggests EOI competitiveness is more sensitive when score uplift variables are not yet reflected in the profile.
